

Joint Announcement by SCI and BCA - New PC1A Category For Precaster Accreditation Scheme

Dear Precasters

The Precaster Accreditation Scheme (PAS) was earlier launched on 1 January 2007 and is administered by the Singapore Concrete Institute (SCI) as part of the effort to promote greater self-regulation by the industry. The PAS aims to:

- Improve the overall quality and productivity of precasters serving the construction industry.
- Provide recognition to precasters who are committed to quality and safety of their production plants and products.
- Encourage continual improvement and professionalism as accredited precasters aspire to upgrade to higher categories.

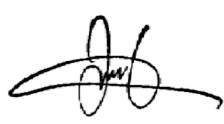

2 To incentivise precasters to adopt a high level of automation, improve productivity and quality, SCI and the Building and Construction Authority (BCA) are pleased to announce the introduction of a new PC1A category under the PAS.

3 Applications for accreditation under the new PC1A category will be open on **9 November 2020**. Details of the accreditation criteria for the new PC1A category are provided in Annex 1.

4 If you have any queries on the (i) application process for accreditation under the new PC1A category or (ii) qualifying criteria of the new PC1A category, please contact Ms Edina Koh at 65520674 or scint@scint.org.sg

Thank you.

Yours faithfully

 <hr/> <p>Tan Sze Tiong President Singapore Concrete Institute</p>	 <hr/> <p>Ang Lian Aik Group Director Construction Productivity and Quality Building and Construction Authority</p>
