SCI PBU MAS Checklist (Part 1)

Company: Plant Location/Address:

Date of Assessment: Lead Auditor/Auditor(s):

			Confo	rmity	Observation /		
S/No	Assessment Criteria	Requirement	Yes (v)	No (X)	Comment		
1.0	Quality Management System						
1.1	Management System	1.1.1 Quality Plan					
		The specific quality plan shall have (a) Project(s) brief • Name and site location • Contract sum and duration • Clients and Main Contractor • Total nos. of PBU (b) PBU feature • Type(s) of PBU • Material items provided under the Builder's contract 1.1.2 Roles and Responsibilities The Management shall define the roles,					
		responsibilities & authorities of staff (organization chart) 1.1.3 Production Layout The plan shall include the assembly lines, storage					
		area and loading/unloading bay					
		1.1.4 Process The flowchart of activities shall show the interaction of processes and decisions made by responsible person					
		1.1.5 Training Plan The plan shall have:- (a) Established a training program for the current year (b) At least one supervisor to attend the Good Industrial Practices Guide Workshop in the relevant trade at the BCA Academy					

			Confo	ormity	Observation/			
S/No	Assessment Criteria	Requirement	Yes (v)	No (X)	Comment			
1.0	Quality Management System							
1.1	Management System	1.1.6 Production Management						
	cont'd	The plan shall have a list of all the approved						
		suppliers & subcontractors, and allocated resources						
		as in manpower allocation, materials and						
		machineries						
		1.1.7 Method Statement						
		The trade-work shall have the approved Method						
		Statement (MS) for production. A summary list of						
		MS shall be documented and maintained						
		1.1.8 Inspection and Test Plan (ITP)						
		The plan shall state the criteria, standard,						
		frequency, responsible person and test date. The						
		ITP shall be tabulated in a log and register for						
		monitoring.						
		1.1.9 Quality Control						
		The production shall be according to quality control						
		procedures and shall document the inspection						
		checklists and test reports						
		1.1.10 Laws and Regulations						
		The organization shall ensure compliance to the						
		legal & other requirements applicable to the						
		production & product						
		1.1.11 Filing system						
		The organization shall (a) Demonstrate the procedure for control of						
		documents and records						
		(b) List the retention periods for records						
		(c) Able to trace the records						

			Confo	ormity	
			Yes	No	Observation/
S/No	Assessment Criteria	Requirement	(√)	(X)	Comment
1.0	Quality Management Sy	stem			
1.2	Human Resource	1.2.1 Competency			
		The staff and workers shall have the relevant			
		qualification, experience, training and skill			
		1.2.2 Particulars of Staff and Workers			
		The organization shall maintain evidence of			
		employment			
2.0	Plant and Design Capab	pilities			
2.1	Plant Capability	2.1.1 Factory Building			
		The production shall be carried out in a building			
		(a) That has an effective roof			
		(b) The floor shall be reinforced concrete slab			
		(c) With gantry crane(s) for lifting			
		2.1.2 Controlled Environment			
		The assembly, fitting and finishing works shall be			
		carried out in a fully enclosed environment with			
		proper set-up to achieve a controlled condition			
		2.1.3 Servicing and Maintenance			
		The organization shall maintain records of servicing			
		and maintenance of plant, machineries, equipment			
		and the calibration of instruments			

			Conformity		
			Yes	No	Observation/
S/No	Assessment Criteria	Requirement	(√)	(X)	Comment
2.2	Design Capability	2.2.1 In-house Design Team The organization shall established an in-house design team with the aid of computer software and hardware or if outsourced to external design consultant, demonstrate the control of drawing			
		production and service 2.2.2 Approved Materials The list of all the approved materials and their samples shall be traceable. The organization shall demonstrate the approved materials are used 2.2.3 Master Drawing List The updated drawing list for all the approved			
		production shop drawings and plans shall be maintained			
3.0	Quality Control In Prod	uction			
3.1	In Process Assessment	3.1.1 Steel Frame The work shall be as per approved MS. The organization shall maintain the inspection checklists records and the reports from the Inspection and Testing Agency (ITA)			NA
		Note: Not Applicable for concrete shell PBU.			

			Confe	ormity	Observation/
			Yes	No	Comment
S/No	Assessment Criteria	Requirement	(√)	(X)	
3.0	Quality Control In Prod	uction			
3.1	In Process Assessment	3.1.2 Drywall The work shall be as per approved MS. Inspection should be accordingly to checklist in the Good Industry Practices Guide on Drywall Note: Not Applicable for concrete shell PBU. 3.1.3 Waterproofing The work shall be as per approved MS. The inspection shall be in accordance to checklist in the Good Industry Practices Guide on Waterproofing for Internal Wet areas			
		*By SCI Accredited waterproofer 3.1.4 Tiling The work shall be as per approved MS. The inspection shall be in accordance to checklist in the Good Industry Practices on Ceramic Tiling or/and Marble & Granite Finishes 3.1.5 Door The work shall be as per approved MS. The inspection shall be in accordance to checklist in the Good Industry Practices Guide on Doors 3.1.6 Window The work shall be as approved MS. The inspection shall be according to checklist in Good Industrial Practices Guide for Aluminum			

			Confo	ormity	Observation/
			Yes	No	Comment
S/No	Assessment Criteria	Requirement	(✓)	(X)	
3.0	Quality Control In Prod	uction			
3.1	In Process	3.1.7 Ceiling			
	Assessment (Cont'd)	The work shall be as approved MS.			
		The inspection shall be according to established			
		checklist and approved drawing			
		3.1.8 Carpentry			
		The work shall be as approved MS.			
		The inspection shall be according to established checklist and approved drawing			
		3.1.9 Sanitary & Plumbing			
		The work shall be as per approved MS.			
		The inspection shall be according to established			
		checklist and approved drawing			
		3.1.10 Sanitary Wares & Fittings			
		The work shall be as per manufacturer's instruction			
		manuals and specifications			
3.2	Testing	3.2.1 Wet Area Water-ponding Test			
		The test shall be witnessed and verified. In-house			
		test as per approved MS. Raised the base by at			
		least 1 metre from the floor level for inspection			
		3.2.2 Tile Pull Off Test			
		The test shall be witnessed and verified. Tested by			
		SAC-SINGLAS or ILAC-MRA accredited lab (Not for			
		tiles on drywall panel or metal panel)			
		3.2.3 Spray test			
		The test shall be witnessed and verified. In-house			
		test as per approved MS. Continuous spraying of			
		water for 15 min at shower area walls and floor

S/No	Assessment Criteria	Requirement	(√)	(X)			
3.0							
3.2	Testing (cont'd)	3.24 Hydrostatic-Pressure Test for Pipe					
		The test shall be verified. In-house test as per					
		approved MS. Hold pressure at 150psi for 2hrs					
		3.2.5 Material & Functional Tests					
		The test reports shall be verified. Tests by SAC-					
		SINGLAS or ILAC-MRA accredited lab.					
		Typically for Drywall, Lightweight Concrete and Waterproofing					
4.0	Storage, Protection, De	elivery and Maintenance					
4.1	Storage Storage	4.1.1 Storage and Handling					
7.1	Storage	Storage of PBUs shall be at designated area and					
		according to approved MS. Allow space for handling					
		and reach for lifting					
		4.1.2 Manufacturer's Label					
		The finished PBU shall have a permanent					
		Manufacturer's Label for identification (accessible &					
		visible)					
4.2	Protection	4.2.1 Protection					
		The work shall be as per approved MS and to					
		secure & protect the sanitary wares, bathroom					
4.0	Storage Protection De	fittings & accessories, if necessary					
4.0	Storage, Protection, Delivery and Maintenance						
4.3	Delivery	4.3.1 Lifting Operation					
		(a) The operator shall demonstrate the					
		loading/unloading according to procedure and					
		approved MS (b) The lifting machineries, equipment and gears					
		shall have valid certificates of regulatory inspections					
		Shall have valid certificates of regulatory inspections	l	I .			

			Conformity				
			Yes	No	Observation/		
S/No	Assessment Criteria	Requirement	(√)	(X)	Comment		
4.0	Storage, Protection, Delivery and Maintenance						
4.3	Delivery (cont'd)	4.3.2 Final Inspection The record of pre-delivery checklists and delivery orders shall be maintained					
4.4	PBU User's Manual	4.4.1 User's Manual The manual shall be available and shall include: (a) Provisions for repairs and renovation (b) Accessibility for maintenance (c) Provisions for bathroom accessories (d) Provisions for Universal Design fit-out (e) Safety precautions					
ΕO	Corrective & Preventive	Note: Not required for HDB Projects					
5.0 5.1	Defects rectification	5.1.1 Control of Nonconformity	T T	T T			
5.1	Defects rectification	(a) A documented procedure shall define the controls and the related responsibilities and authorities, for dealing with defects (b) The records of the nature of defects and subsequent actions taken, including concessions obtained, shall be maintained					
		5.1.2 Repair of Defect The organization shall demonstrate in-process repair work according to approved MS					
5.2	Continual Improvement	5.2.1 Internal Audit The internal audit shall be conducted and documented. The record of management review shall be maintained					
		5.2.2 Achievement The organization shall highlight at least an improvement to the Quality Plan, the Process, the Plant or the PBU
